Thank you for buying my asset!!!
Your feedback motivates me to create new assets and modify them.

HDRP and URP

In order for assets to work correctly in HDRP and URP I have attached 2 packages that you will
need to unzip into your projects

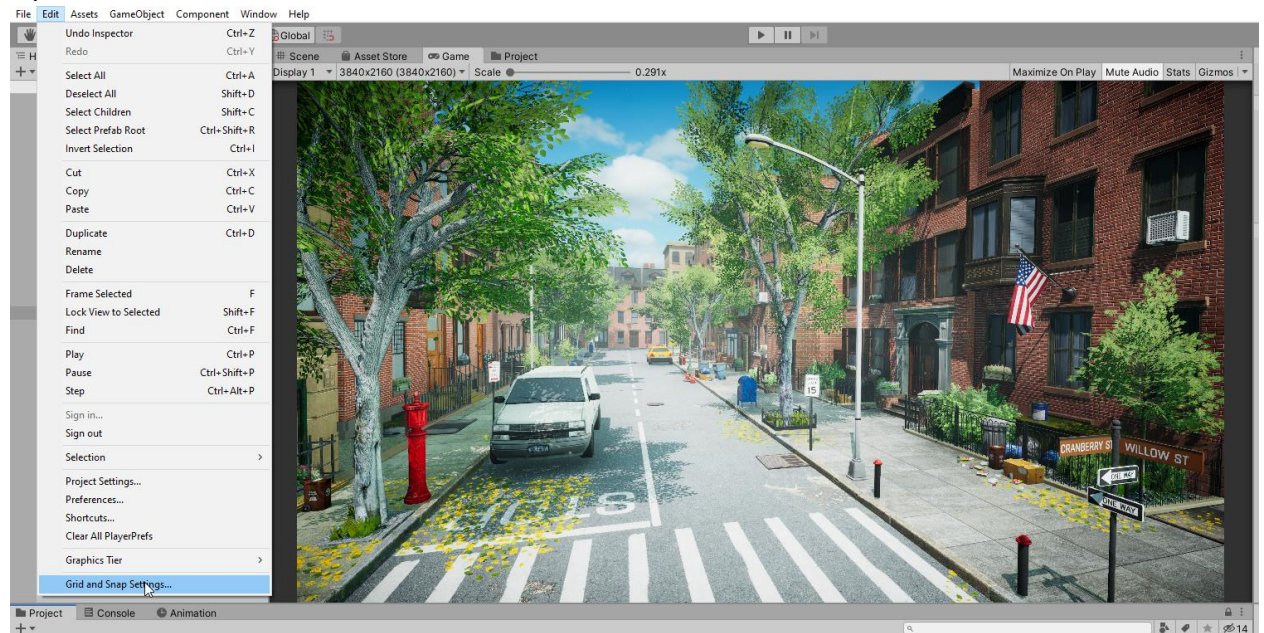

Configuring the package
You need to download post processing

The asset is ready to use!!!

Creating a scene (Modular)

Open this window

Set these values

And with ctrl pressed you can collect scenes as I showed in the video

Thanks for your attention!!!
